

Request access to protected APIs

Microsoft Teams APIs in Microsoft Graph that access sensitive data are considered protected APIs. These APIs require that you have additional validation, beyond permissions and consent, before you can use them. See <https://aka.ms/teamsgraph/protectedAPIs> for more details.

Most protected APIs scenarios use metered APIs and an Azure subscription must be provided:

Announcement: <https://aka.ms/meteredAPIsbilling>

Licensing and payment requirements for Microsoft Teams APIs in Microsoft

Graph: https://aka.ms/Teams_licenses

Service Specific Terms: https://aka.ms/Product_terms_for_Microsoft_Azure_services

To request access to these protected APIs, please complete the following request form.

NOTE: Due to the holiday season, requests submitted after December 13th will be processed during the week of January 9th.

1

Your email address and any others you want to list as an owner (semicolon separated): *

hamza@hmz-digital.fr ; hamza.haddad.dev@gmail.com

2

Publisher name: *

hmz digital

3

Application name: *

rhapp

4

Application ID(s) to enable permissions/subscription for (GUID, semicolon separated): *

GUID looks like xxxxxxxx-xxxx-xxxx-xxxx-xxxxxxxxxxxx.

3d6d5021-b09e-4521-82e6-51c9608e0d57

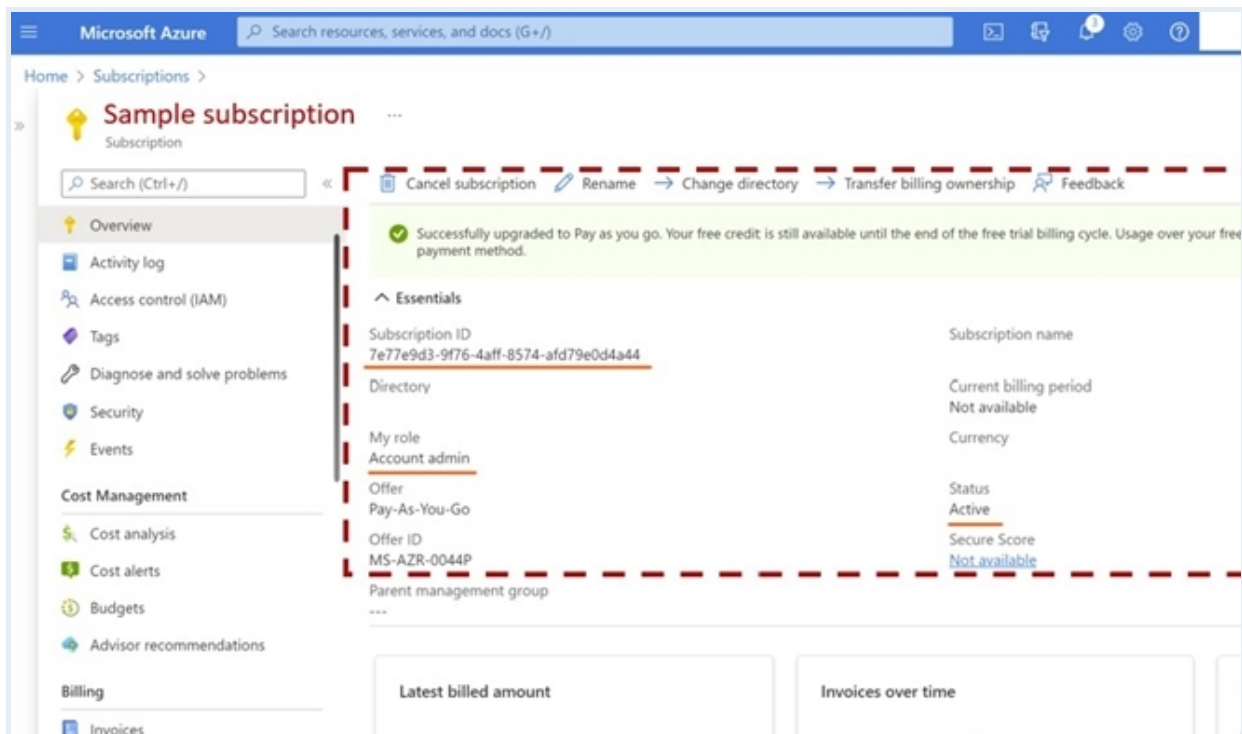

5

Azure billing subscription ID as GUID, this subscription must be under the same tenant. (To setup a new Azure subscription, a billing account administrator should create a new subscription in portal.azure.com; we may contact you to verify this information.)

The following APIs are metered for consumption; see <https://learn.microsoft.com/graph/teams-licenses> for details:

- Export chat: getAllMessages
- Export channel: getAllMessages
- Update channel: chatMessage
- Update chat: chatMessage
- Change notifications: chatMessage
- Change notification: conversationMember

On July 5th 2022, metered consumption is active, and is billed through an Azure subscription. If your application(s) are or will be calling any of these APIs, you will need to provide your Azure subscription ID in order to go beyond the evaluation mode limit (500 messages). You can find this information in the Azure portal as shown below:

Which category best describes your application (select one):

*

- ☐ Data loss prevention
- ☐ Compliance archiving
- ☐ eDiscovery
- ☐ Security and compliance
- ☐ Migration
- ☐ Backup/restore
- ☐ Student safety
- ☒ Employee well-being
- ☐ Interop with other chat systems
- ☐ Reporting and analytics
- ☐ Real-time insights
- ☐ Machine learning
- ☐ Provisioning, initiate collaborations
- ☐ Management and reporting
- ☐

Autre

7

Why does your application need read access to all messages in the tenant? *

(If you don't, you don't need access to protected APIs.)

my application need to get a message from it's id (the id is retrieved from a subscription) so I need

8

Data retention (select one): *

- ☒ This app will not make a copy of Microsoft Teams messages.
- ☐ It is obvious to any admin installing this app that it will make a copy of Microsoft Teams messages.
- ☐ This app will store a copy or summary of message metadata but will not make a copy of the message body, the subject lines, or any attachments. This is disclosed in the app's privacy policy.
- ☐ This app should not be allowed application permissions for reading messages. **(NOTE: Selecting this option will reject your request,** because you do not need protected APIs.)

9

What are the tenant ID's where your application needs to run? *

(GUID semicolon-separated. If you're writing software for other organizations to use, include "all".)

c90faed8-5ee9-4b21-9ba3-84f8b2a15858

10

Does your organization own all those tenants? *

(Unless your software is for all tenants, Protected API request needs to come from the tenant owner.)

- ☒ Yes
- ☐ No

11

May we contact you about your app's use of non-protected APIs? *

(e.g., Azure subscription verification, reliability issues, advanced notice of breaking changes, throttling, etc.)

☐ Yes

☒ No

12

I have read and agree to the Terms and Conditions for Licensing and payment requirements that apply to these APIs (Service Specific Terms in the link below).

https://aka.ms/Product_terms_for_Microsoft_Azure_services *

NOTE: Selecting "No" will reject your request.

☒ Yes

☐ No
